

FS9510

Table stand for room housing

Measuring size:

Output:

Highlights:

Description

Elegant table stand. Optimized for all FuehlerSysteme room housing measuring devices, e.g. CO2 traffic lights.

The angle of inclination of approx. 65 ° enables ideal reading of the display and ensures that the room air is supplied to the sensor in the best possible way.

The table stand has a through-hole for the supply voltage or other cabling.
